App Information Save Mode Basic **Advanced**

Import My App Import Google App

English (Default) Add

App Title *

0/150 byte

* Please enter the title of your application in the selected language.
 * Different types of applications can use the same application name. The same application name can be used for applications for different devices as long as their app IDs are not duplicated.
 * Please refer to [Samsung Basic App Information](#) for further details.

Description *

0/12000 byte

* Please enter descriptions, features, requirements and supported languages for the application in the selected language.
 * For non-English applications, the description must contain a warning stating that the full features of the application might not be available in devices that do not support the language the application is being sold in.

DETAILED STEPS

1. Choose "Advanced" mode - This includes important information and options for users and exposure in the Galaxy Store
2. If selling application to more than one country/region, select English as Default Language. Please note that this is one of evaluation categories
 - Application names and descriptions must be provided in Chinese to sell applications in Chinese app stores
3. App Title (**Required**) - This is the name of the app shown to users in the Galaxy Store
 - When users search, the name of the app entered is the most important information for the search result exposure. Therefore, please be mindful of word spacing/typos, etc.
4. Description (**Required**) - This is the description of the app provided for users in the Galaxy Store
 - Enter an app description that will deliver to users, including an introduction about the app, characteristics, strengths, etc. This is the information that users check to decide whether to purchase/download the app

Add New App – App Information: Tags, Icon, Screenshots, Category

Tags

Tags

* Please enter tags you wish to add. The tags you've entered will be used for searches.

* Please enter up to 5 tags in the field, one by one. A tag up to 60 bytes in length can be entered.

Icon *

Icon

PNG format
512 X 512 pixels
Less than 1024kb

Drop images here.

* If you register watch face, please check [Watch face style guideline](#) in advance.

Screenshots *

Screenshot

JPG/PNG format
Minimum 320 pixels, Maximum 3840 pixels
Image ratio 2:1
Minimum 4 to maximum 8 images can be uploaded.
You can register a minimum of 4 to 8 images, and images are exposed in the order of registration.

Drop images here.

Category *

If you select a category that is not suitable for the application, it may be changed automatically.

Exclusives

* Select a category that best describes your application.

* Selectable categories may differ depending on the type of content.
After registering the binary, please check the category once again.

DETAILED STEPS

1. **Tags (Optional)** - used for searching the Galaxy Store. For effective app promotion, select highly relevant tags that can well represent the characteristics of the app
2. **Icon (Required)** - please refer to Watch Face Style Guideline
3. **Screenshots (Required)** - portrait and landscape are both accepted
4. **Category (Required)**
 - Select the category that best suits your app
 - The name of the category that is actually displayed may differ by country/region
 - If a category that is not suitable for app selected, the category can be adjusted discretionarily
 - Selectable categories may differ depending on the type of content. After registering the binary, please check the category once again.

Add New App – App Information: Age Restriction & Rating Certificate

Age Restriction *

Select ▼

* This is the Samsung Galaxy Store age rating system. When you distribute the content, the age corresponding to the selected rating in each country/region will be displayed. For detailed information on the age rating system in each country/region, please refer to [Contents Age Rating](#).

Rating Certificate for Available Countries/Regions

Available System	Age Restriction	Submit Documentation of Rating Certificate
PEGI	?	0 <input type="text"/> <input type="button" value="Upload"/>
ESRB	?	C, E <input type="text"/> <input type="button" value="Upload"/>
GRAC	?	<div> <div>Select ▼</div> <div>GRAC Classification No. <input type="text"/></div> </div> <input type="button" value="Upload"/>
MJ/DEJUS	?	Select ▼ <input type="text"/> <input type="button" value="Upload"/>
FSK	?	0 + <input type="text"/> <input type="button" value="Upload"/>
ETC		0 + <input type="text"/> <input type="button" value="Upload"/>

* If you have an industry recognized rating certificate on your game application, then we would permit its rating. please upload a scanned image of the document.

* GRAC rating certificate and certification of GRAC Classification Number are required to sell 18+ rated game applications in the Korea store.

DETAILED STEPS

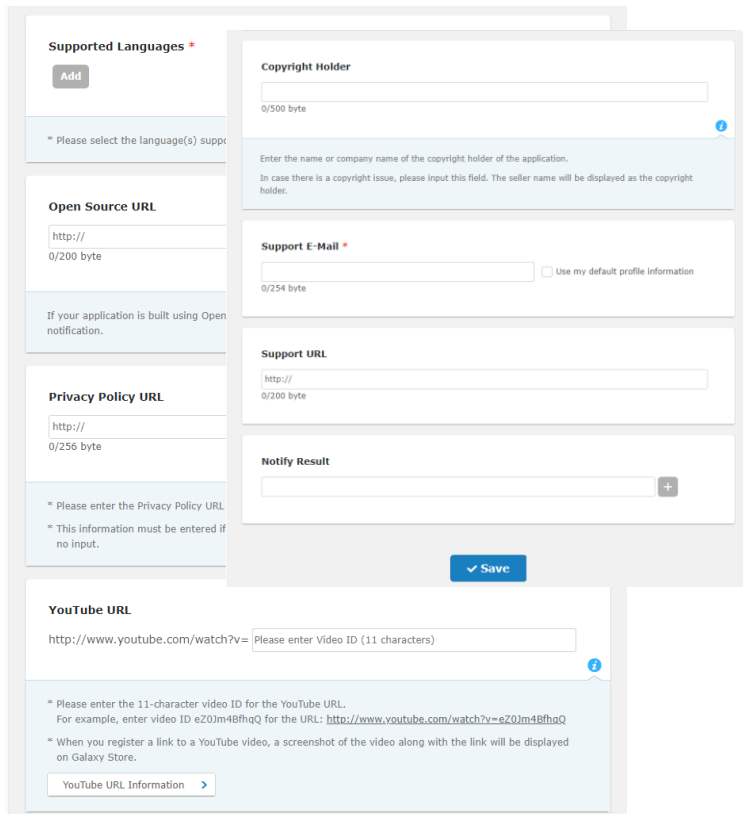

- Age Restriction (Required)** - The Galaxy Store provides information on the appropriate age for each app. Check Age Ratings and set an appropriate rating for the app that is being registered
- Rating Certificate for Available Countries/Regions (Optional)**
 - Registering game rating certificates issue in each country/region is available if the app is registered in the Game category
 - In Korea, a certificate issued by the Game Rating and Administration Committee (GRAC) and the classification number are required for the sale of games with an age restriction of 18+

Refer to Webpage for Further Details

Add New App – Binary

The screenshot shows the 'SAMSUNG Galaxy Store Seller Portal' interface. The top navigation bar includes 'Apps', 'Statistics', 'Accounting', 'Promotion', 'Assistance', and 'Samsung.com'. A secondary bar has 'Guides' and a red 'Add New App' button. The main content area is titled 'Add New App' and shows a form for a new app. The 'Binary' tab is active, and the 'Add Binary' button is highlighted with a red box. The form includes sections for 'Binary' (with a table for file names, versions, and devices), 'Galaxy Watch Resolution(s)', 'Google Mobile Service', and 'Binary Upload'. A large blue arrow points from the 'Add Binary' button towards the 'DETAILED STEPS' section.

DETAILED STEPS

1. There are three features when “Add Binary” button is clicked:
 - Resolution
 - Google Mobile Service
 - Binary upload
2. Special characters, except for underscore (_) and hyphen (-), and spaces are not allowed
3. A binary file cannot be registered if it has the same package name of a binary file that was registered by any OTHER Seller Portal Commercial Seller, even after the file was deleted
4. After uploading the binary files, click the “Save” button and check the binary details

Refer to Webpage for Further Details

Add a new binary.					

Add Binary

Galaxy Watch Resolution(s) *

☐ Check All ☐ 360x480 (Gear S)

☐ 320x320 (Gear1, 2, 2 Neo) ☐ 256x432 (Gear FI2, FI2 Pro)

☐ 360x360 (Gear S2, S3, Sport, Watch, Watch Active)

Google Mobile Service *

☐ Yes ☐ No

Since the sale of applications containing services provided by Google such as Google map, Gmail and Google Talk are prohibited in China, China will be automatically excluded from target countries/regions when [Yes] is selected.

Binary Upload *

When you register binaries for Galaxy Watch applications, please make sure that the app type is identical to that of the other registered binaries.

Upload

Save Cancel

DETAILED STEPS

- The binary is shown only in the devices that support the API Level (OS version) between the MinSdkVersion and MaxSdkVersion values of the binary
- If several binaries support the API Level (OS version) of a device, the binary with the highest version will be shown
- App ID (Package Name) management**
 - The App ID of all the binaries registered for an app must be identical, and you need to use the registered App ID even when re-registering or updating
 - You cannot use App IDs of other apps, but you can reuse the App ID of an app that has been deleted or is no longer offered for sale
- Signing Key management**
 - All binaries must include a Signing Key. A binary that includes a Test Signing Key can be rejected for registration or suspended from sale
 - The Signing Keys of all binaries registered for an app must be identical, and need to use the registered Signing Key even when re-registering or updating
 - If you use the same App ID of an app that is no longer offered for sale, you also need to use the same Signing Key. If users download an app that has a different Signing Key from that of the existing app, the app cannot be installed on the device
- Other points to consider**
 - All binaries registered for an app must support the same attributes (Galaxy Watch app type, Edge Mode). Check the attributes in the automatically extracted results of a registered binary
 - Register up to 10 binary files and the extensions of all binaries registered for an app must be identical
- Make sure to save before clicking to next tab**

Refer to Webpage for Further Details

Beta Testing URL

* Before releasing a Beta Test application that requires signing of partner level or above, let us know first via Seller Portal > Customer support > Contact us
 * Galaxy Watch application can only be tested on Samsung Galaxy devices.
 * Share the beta testing URL link after the application is released.
 * Testers can download a Beta Test application through the beta testing URL link they received.
 * Even for paid applications, users will not be charged since Beta Test applications do not actually support the payment process.
 * Beta tests will be provided at a later date.
 * The beta test application will be immediately released upon beta test submission, regardless of the Start Publication.

DETAILED STEPS

1. Before releasing a Beta Test application that requires signing of partner, platform level or above, let us know first via Seller Portal > Customer support > Contact us
2. Tester Settings (**Required**) - Only an account that has signed up for a Samsung account can be designated as a tester and up to 20,000 testers can be registered
3. Feedback Channel (**Required**) - Enter a URL address or E-mail account where the feedback from testers will be sent
4. Beta Testing URL - Tester can download the beta test app via the shared test participation URL after the app is distributed and will need to also be on the "Tester Settings" list
5. For paid applications, users will not be charged since Beta Test applications do not actually support the payment process
6. Items in an application being beta tested can be purchased only when the version of Samsung IAP SDK integrated into the application is 4.0 or newer
7. Galaxy Watch application can only be tested on Samsung Galaxy devices
8. Fees will be charged to users who purchase items in an application being beta tested in the same way that they are charged when purchasing items in the commercial version

Add New App – In App Purchase: Item Bulk Upload

DETAILED STEPS

1. If there are many in-app items to register, you can register multiple items (up to 1,000 items) in the CSV file format using the "Item Bulk Upload" feature
2. Item Bulk Upload can be used to register Item products only. Subscription products can only be registered individually in the Seller Portal
3. It is not possible to set different prices for each country in bulk upload. The price can be modified in the Seller Portal after bulk upload
4. Once Item Bulk Upload is complete, all items except for subscription products are deleted from the item list, and the uploaded CSV file data are registered. To keep the previously registered items, you must include them along with new items in the CSV file

Please Enter Comments to The Review Team. (English Only)

0/4000 byte Upload

* Please include reference information or describe revisions in English, Chinese and Korean for review.
Applications that need testing for login and payment must have the temporary login ID, password, and fake card number data at the bottom for review evaluation. They may be rejected if the data are not valid and this information is visible only to the App Review team.

* If an app is re-submitted after update or QA failure, please note all of the changes made from previous version.

* You can respond and send attachments for app review, such as copyrighted materials and Video Link for Review Reference. (Attachment limit: 10MB)

* Please refer to [App Review Process](#) for further details.

* Please Check [Information about App Review Policy](#) and [Points to Consider Before App Registration](#) in advance.

Save

DETAILED STEPS

1. "Submit" button

- **Gray** - the required fields have not been saved and the application cannot be submitted. If you click the gray Submit button, a window will pop-up showing a list of the required fields that were left blank
- **Red** - The compatibility and consistency of each field will be checked. In some cases, you might not be able to submit the application and an alert message pops up. Some information may be automatically excluded or you may need to make corrections. If there's no alert after clicking the red Submit button, a window pops up and asks if you wish to continue with the submission

2. The app review policy of the Galaxy Store consists of 3 major categories

- Performance - Functionality, usability, metadata, hardware compatibility
- App Content and Behavior - Sexual content, violence, alcohol, tobacco and drugs, defamation, game and gambling, User-generated content, advertisements
- Legal - Privacy, intellectual property rights, apps for kids, miscellaneous

5. Click the "Submit" button

How to Check Validation Rejection Reason

The screenshot shows the Samsung Galaxy Store Seller Portal interface. At the top, there's a navigation bar with 'Apps', 'Statistics', 'Accounting', 'Promotion', 'Assistance', and 'Samsung.com'. Below this, the 'Applications' section is active. A filter bar shows 'Status' with 'All', 'All', and 'Application Type' with 'All'. A search bar is present. Below the filter bar, there are tabs for 'All', 'Registering', and 'Rejected'. The 'Rejected' tab is selected and highlighted with a red box. Below the tabs, there's a table with columns: Content ID, Application Title, Price, and Status. The table has two rows. The first row is for 'TestSample_IAP' with Content ID '000004', Price 'Free', and Status 'Rejected'. A red box highlights the 'Rejected' status. Below the table, there's a 'Check The Reason' button with a red hand icon pointing to it. A modal window titled 'Reasons for Approval Rejection' is open, showing the rejection reason and a 'Check The Reason' button.

Reasons for Approval Rejection

The registered application could not pass the examination for the following reason.

- Content ID: 000004169625
- Application Title: TestSample_IAP
- Rejected Reason: [Redacted]
- Attached File: [Redacted]
- comment: Dear seller,

Thank you for your application submission.

We have reviewed your application and found some issues need to be modified.

Please check the attached file to see which issues are detected.

We would be glad if we can see your creation with those issues fixed.

- Content Name : TestSample_IAP
- Content ID : 000004169625
- Reported Date : 5/2/2019

If you have any questions, please contact us at <http://help.content.samsung.com/csseller>

Thank you.

Samsung Galaxy Apps Validation Team

Re-register Application Go to Support

DETAILED STEPS

1. Go to seller portal
2. Click "Apps"
3. For the application that was rejected, go to "Rejected" tab
4. Click "Check The Reason" button
5. For detailed validation rejection report, click "attached file"

NOTES

1. Once the issue is fixed, you can re-register by clicking "Re-register Application" button
2. If you have any questions regarding the validation rejection reason, please click "Go to Support" > 1:1 inquiry (Specify content ID of the rejected application)

1. What is the official policy from Samsung on the Play Protect prompt for games published exclusively on Galaxy Apps Store?

- We have no specific policy on this Play Protect issue, just detect it as an installation failure issue. Because it caused by Google security policy(OS), and it is impossible to block the message on our end. We recognize it may occur for an application which has no security issue randomly, sometimes it happens in applications that have been updated dozens of times without any issues. However we are not able to ignore it and distribute to our store because of our users. Users strongly trust this play protect message and urge us to suspend this unsecured app. This undermines the reliability of our Galaxy Store, so we reject if the prompt occur while app install. Unfortunately only seller can solve this problem.

2. Why is certification of my app taking so long?

- Pre-Review takes approximately 1 business day and will be live in the Galaxy Store immediately if the app passes Security issue, Contents and Basic function test. During this time, the Review team will continue to examine the applications functions. If there are any issues or problems, the app will be suspended and removed from the Galaxy Store. This process is 2 to 4 business days.
